SUBJECT INDEX

Acetone,
Thermochemical investigations of associated solutions. 10. Excess enthalpies and excess volumes of ternary acetone + bromoform + *n*-hexane mixtures 291
Acetonitrile,
Thermodynamics of associated solutions of acetonitrile and 2-methyl-2-propanol 355
N-Acetyl-L-valinamide,
Crystal structure and thermodynamics of phase transitions of *N*-acetyl-L-valinamide 229
Acidity,
Determination of the surface acidity of layered metal phosphates by NH_3 temperature-programmed desorption 91
Adsorption,
Thermodynamic aspects of multicomponent mixture adsorption equilibria on zeolites 31
Alloys,
Alloying behaviour of thorium with Fe, Co and Ni 117
The technical problems of sample pan and base line in DSC: an example with Al–Mn rapidly solidified alloys 453
Aluminium,
The technical problems of sample pan and base line in DSC: an example with Al–Mn rapidly solidified alloys 453
Aqueous solutions,
Microcalorimetric study of successive dilutions of aqueous solutions 445
Arsenic
Crystallization kinetics in the As–Se–Te system 427
Associated solutions,
Thermochemical investigations of associated solutions. 10. Excess enthalpies and excess volumes of ternary acetone + bromoform + *n*-hexane mixtures 291
Thermodynamics of associated solutions of acetonitrile and 2-methyl-2-propanol 355

Base line,
The technical problems of sample pan and base line in DSC: an example with Al–Mn rapidly solidified alloys 453
Bifunctional alcohols,
Enthalpies of dilution of bifunctional alcohols in concentrated aqueous solutions of urea at 298.15 K 241
Binary mixtures,
Excess volumes of binary mixtures containing morpholine 203
Binders,
The influence of heavy metals on the hydration of binders of interest for chemical gypsum stabilisation 107
Bismuth compounds,
Molten lithium nitrate–potassium nitrate eutectic: the reaction of bismuth compounds 311
Bismuth oxide,
Devitrification studies of various PbO-content $PbO–B_2O_3–ZnO$ glass systems 367
Bromoform,
Thermochemical investigations of associated solutions. 10. Excess enthalpies and excess volumes of ternary acetone + bromoform + *n*-hexane mixtures 291

Cadmium hydroxide nitrate,
Standard enthalpy of formation of $Cd_3(OH)_5NO_3$ 461
Calcium chloride,
Study of the $KCl–CaCl_2–Ca_3(PO_4)_2–H_2O$ system at 25 °C: hydrolysis of β-tricalcium phosphate in saline medium, 389
Calorimeter,
An a.c. calorimeter for high-resolution heat capacity measurements in a magnetic field 127
Chloride complexes,
Infrared, thermal and structural properties of first transition series metal chloride and perchlorate complexes of quinoxaline 375
Clupeine,
Thermal stability of herring DNA in the presence of clupeine fractions 133
Cobalt,
Alloying behaviour of thorium with Fe, Co and Ni 117
Compatibility,
A study of crystallisation behaviour and compatibility of high-density polyethylene/linear low-density polyethylene blends 163
Pair interaction parameter for compatible

poly(styrene)–poly(α-methylstyrene) mixtures 223
Complexation,
Thermodynamics of the complexation of lanthanides by pyrazinecarboxylate 341
Complexing ability,
Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of zinc(II) complexes (and other divalent cations) of phenoxyacetate, 2-phenoxypropionate and 2-phenoxybutyrate in aqueous solution at different temperatures and ionic strengths 449
Conformational disorder,
The detection of conformational disorder by thermal analysis 59
Crystal structure,
Crystal structure and thermodynamics of phase transitions of *N*-acetyl-L-valinamide 229
Crystallisation,
A study of crystallisation behaviour and compatibility of high-density polyethylene/linear low-density polyethylene blends 163
Crystallisation kinetics in the As–Se–Te system 427
Isothermal crystallisation kinetics of liquid crystal semiflexible polyesters 179
Curing,
Modelling the curing of epoxy-resin coating at low temperature (50 °C) 347
α-Cyclodextrin,
Calorimetric and diffusional behaviour of the system α-cyclodextrin–L-phenylalanine in aqueous solution 155

Decomposition,
Thermal decomposition and reduction with H_2 and C_2H_4 of silver(I, II) oxide 435
Dehydration,
Thermal and kinetic parameters of phyllosilicate dehydration 333
Desorption,
Determination of the surface acidity of layered metal phosphates by NH_3 temperature-programmed desorption 91
Devitrification,
Devitrification studies of various PbO-content $PbO–B_2O_3–ZnO$ glass systems 367
Dicaesium cadmium tetraiodide,
Standard enthalpy of formation of the monoclinic form of Cs_2CdI_4 463
Diesel exhaust gases,
Catalytic oxidation of soot from diesel exhaust gases. 1. Screening of metal oxide catalysts by TG–DTG–DTA analysis 83
Differential scanning calorimetry,
The technical problems of sample pan and base line in DSC: an example with Al–Mn rapidly solidified alloys 453
Dilution,
Enthalpies of dilution of bifunctional alcohols in concentrated aqueous solutions of urea at 298.15 K 241
Microcalorimetric study of successive dilutions of aqueous solutions 445

Enthalpy of formation,
Standard enthalpy of formation of $Cd_3(OH)_5NO_3$ 461
Standard enthalpy of formation of the monoclinic form of Cs_2CdI_4 463
Epoxy-resin coating,
Modelling the curing of epoxy-resin coating at low temperature (50 °C) 347
Excess enthalpy,
Modelling the excess enthalpy for ternary systems formed by organic compounds 415
Thermochemical investigations of associated solutions. 10. Excess enthalpies and excess volumes of ternary acetone + bromoform + *n*-hexane mixtures 291
Excess volume,
Excess volumes of binary mixtures containing morpholine 203
Thermochemical investigations of associated solutions. 10. Excess enthalpies and excess volumes of ternary acetone + bromoform + *n*-hexane mixtures 291

Food science,
Calorimetry, thermal analysis and chemical thermodynamics in food science. Report on the panel discussion 253

Glass systems,
Devitrification studies of various PbO-content $PbO–B_2O_3–ZnO$ glass systems 367
Gypsum,
The influence of heavy metals on the hydration of binders of interest for chemical gypsum stabilisation 107

Heat capacity,
A heat capacity study of the high-T_c superconducting compounds $MBa_2Cu_3O_{7-x}$ (M ≡ Y, Eu, Ho) near T_c 69
An a.c. calorimeter for high-resolution heat capacity measurements in a magnetic field 127
Heavy metals,
The influence of heavy metals on the hydra-

tion of binders of interest for chemical gypsum stabilisation 107
Herring DNA,
Thermal stability of herring DNA in the presence of clupeine fractions 133
Hexane,
Thermochemical investigations of associated solutions. 10. Excess enthalpies and excess volumes of ternary acetone + bromoform + *n*-hexane mixtures 291
Hydration,
The influence of heavy metals on the hydration of binders of interest for chemical gypsum stabilisation 107
Hydrolysis,
Study of the $KCl-CaCl_2-Ca_3(PO_4)_2-H_2O$ system at 25 °C: hydrolysis of β-tricalcium phosphate in saline medium 389

Immiscible solvents,
Theoretical determination of the Gibbs energy of solution and transfer between immiscible solvents, with comments on the dynamics of phase transfer 213
Iron,
Alloying behaviour of thorium with Fe, Co and Ni 117

Lanthanides,
Thermodynamics of the complexation of lanthanides by pyrazinecarboxylate 341
Lead oxide,
Devitrification studies of various PbO-content $PbO-B_2O_3-ZnO$ glass systems 367
Liquid crystals,
Isothermal crystallisation kinetics of liquid crystal semiflexible polyesters 179
Lithium nitrate,
Molten lithium nitrate–potassium nitrate eutectic: the reaction of bismuth compounds 311

Magnetic field,
An a.c. calorimeter for high-resolution heat capacity measurements in a magnetic field 127
Magnetites,
Influence of oxygen pressure on oxidation–reduction phenomena observed with submicrometre-sized manganese-substituted magnetites 265
Manganese,
The technical problems of sample pan and base line in DSC: an example with Al–Mn rapidly solidified alloys 453
Metal chelates,
Structure identification of 2-thiohydantoin and its metal chelates by thermal and spectral analysis 399
Metal formates,
A thermal study on isomorphous metal formates 75
Metal oxide catalysts,
Catalytic oxidation of soot from diesel exhaust gases. 1. Screening of metal oxide catalysts by TG–DTG–DTA analysis 83
Metal phosphates,
Determination of the surface acidity of layered metal phosphates by NH_3 temperature-programmed desorption 91
2-Methyl-2-propanol,
Thermodynamics of associated solutions of acetonitrile and 2-methyl-2-propanol 355
Micellar solutions,
Apparent and partial molar enthalpies of potassium 4-((hexylcarbonyl)amino)-2-hydroxybenzoate aqueous micellar solutions 277
Microcalorimetric study,
Microcalorimetric study of successive dilutions of aqueous solutions 445
Molar enthalpy,
Apparent and partial molar enthalpies of potassium 4-((hexylcarbonyl)amino)-2-hydroxybenzoate aqueous micellar solutions 277
Morpholine,
Excess volumes of binary mixtures containing morpholine 203

Nickel,
Alloying behaviour of thorium with Fe, Co and Ni 117

Oligosaccharides,
Physical chemistry of aqueous solutions of oligosaccharides 17
Organic compounds,
Modelling the excess enthalpy for ternary systems formed by organic compounds 415
Thermodynamic study of organic compounds in octan-1-ol. 3. Enthalpy effects connected with the partitioning of some bifunctional compounds between water and octan-1-ol 195
Organic solvents,
Proteins solubilized in organic solvents via reverse micelles: thermodynamic studies 1
Otan-1-ol,
Thermodynamic study of organic compounds in octan-1-ol. 3. Enthalpy effects connected with the partitioning of some bifunctional compounds between water and octan-1-ol, 195
Oxidation,
Catalytic oxidation of soot from diesel exhaust gases. 1. Screening of metal oxide cata-

lysts by TG–DTG–DTA analysis 83
Influence of oxygen pressure on oxidation–reduction phenomena observed with submicrometre-sized manganese-substituted magnetites 265
Oxygen pressure,
Influence of oxygen pressure on oxidation–reduction phenomena observed with submicrometre-sized manganese-substituted magnetites 265

Pair interaction,
Pair interaction parameter for compatible poly(styrene)–poly(α-methylstyrene) mixtures, 223
Partitioning,
Thermodynamic study of organic compounds in octan-1-ol. 3. Enthalpy effects connected with the partitioning of some bifunctional compounds between water and octan-1-ol, 195
Peptides,
A microscopic approach to the structure and thermodynamic properties of peptides and proteins 141
Perchlorate complexes,
Infrared, thermal and structural properties of first transition series metal chloride and perchlorate complexes of quinoxaline 375
Pesticides,
Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of zinc(II) complexes (and other divalent cations) of phenoxyacetate, 2-phenoxypropionate and 2-phenoxybutyrate in aqueous solution at different temperatures and ionic strengths 449
Phase transfer,
Theoretical determination of the Gibbs energy of solution and transfer between immiscible solvents, with comments on the dynamics of phase transfer 213
Phase transitions,
Crystal structure and thermodynamics of phase transitions of *N*-acetyl-L-valinamide, 229
Phase transitions and their thermal hysteresis in anhydrous potassium acetate 325
Phenoxyacetate,
Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of zinc(II) complexes (and other divalent cations) of phenoxyacetate, 2-phenoxypropionate and 2-phenoxybutyrate in aqueous solution at different temperatures and ionic strengths 449
2-Phenoxybutyrate,
Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of zinc(II) complexes (and other divalent cations) of phenoxyacetate, 2-phenoxypropionate and 2-phenoxybutyrate in aqueous solution at different temperatures and ionic strengths 449
2-Phenoxypropionate,
Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of zinc(II) complexes (and other divalent cations) of phenoxyacetate, 2-phenoxypropionate and 2-phenoxybutyrate in aqueous solution at different temperatures and ionic strengths 449
Phenylalanine,
Calorimetric and diffusional behaviour of the system α-cyclodextrin–L-phenylalanine in aqueous solution 155
Phyllosilicate,
Thermal and kinetic parameters of phyllosilicate dehydration 333
Poly(α-methylstyrene),
Pair interaction parameter for compatible poly(styrene)–poly(α-methylstyrene) mixtures 223
Poly(styrene),
Pair interaction parameter for compatible poly(styrene)–poly(α-methylstyrene) mixtures 223
Polyesters,
Isothermal crystallisation kinetics of liquid crystal semiflexible polyesters 179
Polyethylene,
A study of crystallisation behaviour and compatibility of high-density polyethylene/linear low-density polyethylene blends 163
Polytetrafluoroethylene,
A study on the thermal behaviour and structural characteristics of polytetrafluoroethylene 189
Potassium 4-((hexylcarbonyl)amino-2-hydroxybenzoate,
Apparent and partial molar enthalpies of potassium 4-((hexylcarbonyl)amino)-2-hydroxybenzoate aqueous micellar solutions 277
Potassium acetate,
Phase transitions and their thermal hysteresis in anhydrous potassium acetate 325
Potassium chloride,
Study of the $KCl–CaCl_2–Ca_3(PO_4)_2–H_2O$ system at 25 °C: hydrolysis of β-tricalcium phosphate in saline medium 389
Potassium cryptate,
Structural, thermal and microscopic studies of potassium cryptate K(222) $NCS \cdot H_2O$ 99

Potassium nitrate,
Molten lithium nitrate–potassium nitrate eutectic: the reaction of bismuth compounds 311
Proteins,
A microscopic approach to the structure and thermodynamic properties of peptides and proteins 141
Proteins solubilized in organic solvents via reverse micelles: thermodynamic studies 1
Pyrazinecarboxylate,
Thermodynamics of the complexation of lanthanides by pyrazinecarboxylate 341

Quinoxaline,
Infrared, thermal and structural properties of first transition series metal chloride and perchlorate complexes of quinoxaline 375

Reduction,
Influence of oxygen pressure on oxidation–reduction phenomena observed with submicrometre-sized manganese-substituted magnetites 265
Thermal decomposition and reduction with H_2 and C_2H_4 of silver(I, II) oxide 435
Reverse micelles,
Proteins solubilized in organic solvents via reverse micelles: thermodynamic studies 1
Rhodium(I) complexes,
Thermogravimetric study of some new rhodium(III) and rhodium(I) complexes containing heterocyclic tellurium ligands 409
Rhodium(III) complexes,
Thermogravimetric study of some new rhodium(III) and rhodium(I) complexes containing heterocyclic tellurium ligands 409

Sample pan,
The technical problems of sample pan and base line in DSC: an example with Al–Mn rapidly solidified alloys 453
Selenium,
Crystallization kinetics in the As–Se–Te system 427
Silver(I, II) oxide,
Thermal decomposition and reduction with H_2 and C_2H_4 of silver(I, II) oxide 435
Solution,
Theoretical determination of the Gibbs energy of solution and transfer between immiscible solvents, with comments on the dynamics of phase transfer 213
Solutions,
Physical chemistry of aqueous solutions of oligosaccharides 17
Thermodynamics of solutions: selected aspects 43
Soot,
Catalytic oxidation of soot from diesel exhaust gases. 1. Screening of metal oxide catalysts by TG–DTG–DTA analysis 83
Structure,
A microscopic approach to the structure and thermodynamic properties of peptides and proteins 141
Structure identification of 2-thiohydantoin and its metal chelates by thermal and spectral analysis 399
Superconductors,
A heat capacity study of the high-T_c superconducting compounds $MBa_2Cu_3O_{7-x}$ (M ≡ Y, Eu, Ho) near T_c 69

Tellurium,
Crystallization kinetics in the As–Se–Te system 427
Tellurium ligands,
Thermogravimetric study of some new rhodium(III) and rhodium(I) complexes containing heterocyclic tellurium ligands 409
Ternary systems,
Modelling the excess enthalpy for ternary systems formed by organic compounds 415
Thermal hysteresis,
Phase transitions and their thermal hysteresis in anhydrous potassium acetate 325
Thermodynamics,
Thermodynamics of solutions: selected aspects 43
2-Thiohydantoin,
Structure identification of 2-thiohydantoin and its metal chelates by thermal and spectral analysis 399
Thorium,
Alloying behaviour of thorium with Fe, Co and Ni 117
Transfer,
Theoretical determination of the Gibbs energy of solution and transfer between immiscible solvents, with comments on the dynamics of phase transfer 213
β-Tricalcium phosphate,
Study of the $KCl–CaCl_2–Ca_3(PO_4)_2–H_2O$ system at 25°C: hydrolysis of β-tricalcium phosphate in saline medium 389

Urea,
Enthalpies of dilution of bifunctional alcohols in concentrated aqueous solutions of urea at 298.15 K 241

Water,
Study of the $KCl–CaCl_2–Ca_3(PO_4)_2–H_2O$

system at 25 °C: hydrolysis of β-tricalcium phosphate in saline medium 389
Thermodynamic study of organic compounds in octan-1-ol. 3. Enthalpy effects connected with the partitioning of some bifunctional compounds between water and octan-1-ol 195

Zeolites,
Thermodynamic aspects of multicomponent mixture adsorption equilibria on zeolites 31
Zinc oxide,
Devitrification studies of various PbO-content $PbO-B_2O_3-ZnO$ glass systems 367
Zinc(II) complexes,
Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of zinc(II) complexes (and other divalent cations) of phenoxyacetate, 2-phenoxypropionate and 2-phenoxybutyrate in aqueous solution at different temperatures and ionic strengths 449
